Primary Immune Deficiency (PI) causes children and adults to have infections that come back frequently or are unusually hard to cure. 1:500 persons are affected by one of the known Primary Immune Deficiencies. If you or someone you know is affected by two or more of the following Warning Signs, speak to a physician about the possible presence of an underlying Primary Immune Deficiency.

www.ImmuneDisease.com

These warning signs were developed by the Jeffrey Modell Foundation Medical Advisory Board. Consultation with Primary Immune Deficiency experts is strongly suggested.

For information or referrals, contact the Jeffrey Modell Foundation at 866-INFO-4-PI or info4PI.org.
